Unleashing a generation to learn and lead

How to Cast From Your Computer to Your TV

To get the most out of your (re)Educate event you should plan on connecting your laptop or phone to your TV.

Direct HDMI Connection

If your laptop or device has a HDMI port you should be able to connect your device directly to the TV via a HDMI cable. Make sure you choose the proper input on your TV and you may need to configure the sound to transmit through the TV. Check [here](#) for more details.

AirPlay with Apple

Use AirPlay to stream or share content from your Apple device to your Apple TV or AirPlay 2-compatible smart TV. For detailed instructions please visit the Apple Support page [here](#).

Cast with Google or Android

Use Chromecast to stream or share content from your device to your Chromecast or Chromecast-compatible smart TV. For detailed instructions please visit the Google Chromecast Support page [here](#).

Helpful Tip: Test your device setup a few days before the event to avoid tech issues interrupting your enjoyment of the evening.
